Noah License Registration Number Generation Tool

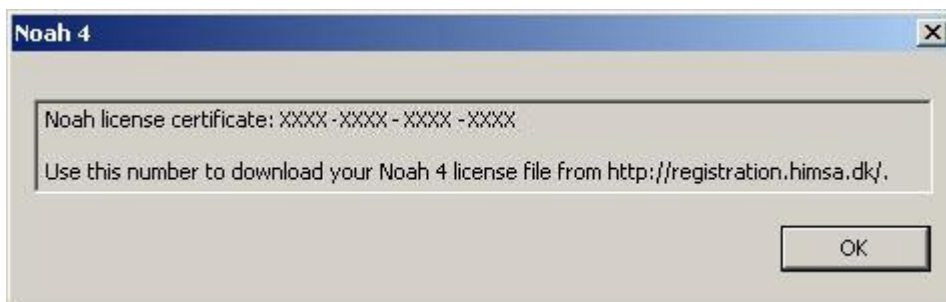

March 11' 2011

You can use the Noah 4 License Registration Number Generator Tool to generate a Noah 4 registration number for upgrading your NOAH System 3 license.

This would be necessary for example, if you wish to install your Noah System 4 upgrade on a new PC. In this case, you will need to register and upgrade your NOAH 3 license from the old PC first, and then move the license to your new Noah 4 PC.

To use this tool:

1. Make sure you are on the PC where your NOAH System 3 is installed.
2. Double-click on the NoahLicenseRegNoGen.exe file.

3. Copy and save this registration information. You will need it whenever you need to download your Noah 4 license.
4. Then, use the 16-digit number in this window to register and download your license at <http://registration.himsa.dk>. Click here for instructions.
